Hydrogen Enhanced Living

2021 Product Catalogue

The Vesta H₂

Healthy water starts by being clean and contaminant-free.

170+ reasons to be drinking Ultra Water. Benefits backed by research.

1,000+ peer-reviewed studies show that molecular hydrogen (H₂) offers benefits in over 170+ disease models and health conditions.

Drink the ultimate antioxidant - in your water!

Free radical damage causes oxidative stress. Oxidation causes iron or apples to “rust”. Antioxidants prevent or slow oxidation. Research shows the H₂ in Ultra Water selectively targets only the damaging radicals. It's the “ultimate” antioxidant!

Ease your aches and pains.

Oxidative stress damages your cells, causing pain and inflammation. Drinking Ultra Water can ease chronic and acute aches and pain.

Go longer. Go stronger.

ATP powers your cells. It's the source of our energy. Research shows H₂ helps increase ATP giving you more energy while decreasing lactic acid. Athlete? Exerciser? Just want more pep? Ultra Water helps improve performance and recovery.

Help balance your pH.

Ultra Water is alkaline and ionized making it rich in naturally occurring beneficial minerals like calcium and magnesium that help you alkalize and maintain a healthy pH balance.

The H₂ Series - Optimal Hydrogen Performance

Ultra Water: The Best Filtration

The H₂ Series offers you dual filtration and UltraWater. It is the only ionizer filter independently tested by an EPA certified lab to reduce 249 different contaminants up to 99.9%. Even the toughest to remove such as arsenic, other heavy metals, chromium VI, pharma and more.

Improved DARC II Cleaning

Clean electrodes are critical to H₂ performance. Our DARC II system cleans your electrodes with every use. It helps ensure that the electrodes – the most critical component - stay free of damaging scale buildup. Improved by eliminating the solenoids, we've increased DARC's durability, making DARC II the new standard in performance and reliability.

Flow Control System

Superior flow control with an LCD display and adjustable valve so you can precisely select the rate of flow that's right for you.

Advanced SmartDesign Electrodes

We do not believe in over-sized or over-powered electrodes, which are often a sign of inefficient design. Our SmartDesign Electrodes deliver top performance and to run with maximum efficiency and lasting durability.

H₂ Infusion Technology

Our H₂Infusion Membranes are made in-house and are ultrasonically pressed rather than chemically bonded like everyone else's. This provides you with a distinctly superior membrane, designed to work specifically with our electrodes, giving you a hydrogen water maker with unmatched performance.

When you marry our advanced SmartDesign Electrodes to our H₂Infusion Membranes, the result is H₂Infusion Technology and that means better pH, -ORP and H₂ performance for your alkaline ionizer.

The *elita* Pure Non-Electric

The *elita* Pure Countertop

The elegant German design of the new *elita* Pure will complement any kitchen. Add in our unrivaled Ultra Water technology and you have the ultimate in filtered, alkaline, ionized, H₂-enhanced water.

The *elita* Pure incorporates Ultra Water Filtration Technology, offering you unmatched broad-based contaminant removal. Independently tested against 172 contaminants reducing virtually all of them to 99.9% - even the toughest. Then we add .01 micron Hollow Membrane Technology to target microbial contaminants such as bacteria, virus, cysts and fungi. You get the widest range of contaminant reduction available.

The *elita* Pure Undersink

Get all the benefits of the *elita* Pure countertop, with undersink elegance. The *elita* Pure Ultra Water filter is in a pressure-rated housing under your sink - allowing for minimum use of counterspace. The inline filter life counter sends a signal to an LED indicator above the counter, at the base of a stylish faucet telling you exactly when to change your filter.

Available in chrome and brushed nickel finishes.

Whole House Filtration Solutions

It's true that we all want clean, healthy drinking water. But what about the water you use to do laundry, brush your teeth, wash your hands and face, cooking, cleaning, and more? The water you use for these everyday tasks may be leaving chemical residues behind (not to mention what you breathe in)! We applied our filtration expertise to whole house filtration systems, so you can have affordable, effective and worry-free protection in three great options: Basic, Premium and our Salt-Free Softener!

Peace of mind comes when you know that the water coming into your home is free of harmful contaminants and toxins.

Your skin never felt better. Showering, bathing and washing your face with water that is free of contaminants and toxins leaves you feeling fresh and renewed.

Breathe easy. Stop inhaling chemicals like chlorine while you're trying to enjoy a hot shower. UltraHome removes those harmful chemicals.

Easy installation. In most homes there is an easily accessible service loop designed for this type of installation. Any licensed plumber can help with UltraHome installations.

Cleaner, brighter clothes. No more harmful effects from chlorine in your laundry. No fading, no stiffness, no residual, just clean.

Long life. In an average sized home with 2.5 bathrooms, UltraHome will last up to 10 years (5 years minimum) depending on your daily water usage and water quality.

Customizable. UltraHome is completely customizable to your home's unique needs, including size and filtration capacity.

Hassle free. Our systems are designed to be very low maintenance to maintenance-free after installation, unlike inferior systems.

Full Range of Filtration Products

All water is not created equal. Water quality is different everywhere you go. It's why we have a wide range of pre-filtration options to help protect your ionizer. Maybe you have hard water and need scale protection, or perhaps you need extra Fluoride protection. Whatever your quality water needs are, we have you covered.
